

Brainstorming & Idea Prioritization Template

Date	05 July 2026
Team ID	SWTID-2026-8308
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Anusuri Asha Deepa	Develop an MLbased crop recommendation system using soil and climate data	Machine Learning	1
2	Anusuri Asha Deepa	Design the ER diagram covering User, SoilData, Crop, and Prediction entities	Data Analysis	2
3	Anusuri Asha Deepa	Compare ML algorithms (Random Forest, KNN, Decision Tree) to find the best model	Model Development	1

4	Anusuri Asha Deepa	Build a Flaskbased web app with a simple input form for farmers	Web Application	3
5	Anusuri Asha Deepa	Test the deployed system with inputs	Testing	3
		and validate predictions		
6	Team Discussion	Team Discussion Provide crop recommendations with confidence scores	Machine Learning	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML- based crop prediction using Random Forest	High	High	High	Yes

2	ER diagram + data preprocessing	High	High	High	Yes
3	Flask web app with form-based UI + testing	Medium	High	Medium	Yes
