

Empathy Map

Date	05 July 2026
Team ID	SWTID-2026-8308
Project Name	OptiCrop: SmartAgricultural Production Optimization Engine
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
☐ "I'm not sure which crop will give the best yield this season." ☐ "I don't have access to an agricultural expert nearby." ☐ "I want to make the most of my land and soil quality."	☐ - "What if I choose the wrong crop and lose money this season?" ☐ - "There must be a better way to decide based on my soil's actual nutrients." ☐ - "I wish there was a quick, simple tool to guide my decision."
DOES	FEELS

☐ Manually checks soil condition based on experience/tradition ☐ Consults neighboring farmers or local vendors for crop advice ☐ Grows the same crop every season without data-backed reasoning	☐ Uncertain about crop selection each planting season ☐ Anxious about financial risk from a poor harvest ☐ Hopeful that technology could make farming decisions easier and more reliable
